

## WRIST-SIZING INSTRUCTIONS

The metal bracelet of your watch can be correctly sized from the on-line store at no extra cost or at any authorized retailer/service center. Please note that the second option may incur an additional cost.

### STEP 1

Print this file with no scaling and cut out the watch with the ruler on the left.

### STEP 2

Place the watch dial on top of your wrist and wrap the ruler fully around making sure it is not too tight. Hamilton recommends you leave enough space to put your little finger between the strap and your wrist. If you prefer to wear your watch looser, please take this into account when measuring.

### STEP 3

Write down the size that is aligned with the upper border of the dial. Use this number to select the closest option from the "Bracelet Size" menu. Please note that we will size your watch to the measurement provided, without extra slack.

If you have any questions or require further assistance measuring your bracelet size, you can contact us at [Hamilton.US@swatchgroup.com](mailto:Hamilton.US@swatchgroup.com)
